Issued/Filed Dates: **Nov. 7, 1995 / April 27, 1994**

Application Number: **JP1994000089627**

IPC Class: **A61B 1/00; A61B 5/07;**

Abstract:

Purpose: To provide a capsule endoscopic device capable of lessening the burden of a patent without restraining the patient's mouth, nose, etc., at all during inspection.

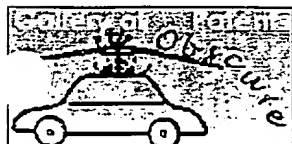

Constitution: This capsule endoscopic device 1 has a self-traveling part 2 having an image pick-up means which is inserted into the celom and is used to observe at least the inside of the body and a power source part 5 which supplies energy. The capsule endoscopic device 1 is provided with a balloon 20 for fixing part of the device in the celom. This balloon 2c and the self-traveling part 2 are connected by a flexible cable 6 in such a manner that the self-traveling part 2 having the image pickup means is advanced and retreated into and out of the fixing part in the celom.
